

Visual Programming

Final Project

Project Pre-requirements:

- ✓ Choose Your Project (Banks, Pharmacy, Store, Library, Hospitals, Airports, Supermarket, Student Management, Restaurant or others).
- ✓ This is a team project (2-3).

Subjects should be covered in the project:

- OOP Concepts.
- All UI Control.
- Different Layout.
- Add – Show - Update - Delete – Exit.
- Sign Up – Sign In – Logout.
- Event (Action – Key Pressed – Mouse Pressed).
- multi-stage (Sign Up & Sign In & Home & etc.....).
- Scene Builder.
- Dialog.
- Text Input Dialog.
- Linear Gradient Color (in Scene Builder).
- CSS (in Scene Builder).
- Database (My SQL).

e-Store Management System as example:

Create an e-Store that stores the products it imports in a database according to the following requirements.

Product data:

- ✓ product code.
- ✓ product name.
- ✓ Product web address (clicking on the title opens the product page).
- ✓ Product image (the image path is saved) with the product image displayed on the screen.
- ✓ Production Date
- ✓ Purchasing price
- ✓ Currency (Dinar - Dollar - Euro)
- ✓ Quantity.
- ✓ Total (calculated field).

Important points:

- Analyze the system and design appropriate tables for the previous data.
- The entry screen includes entering previous data and a table showing all previously entered items
- the user.
- The project includes a login with a username and password. In the absence of a user, a new user option appears.

- The password for the current user can be changed after the login process, provided that the password is entered Old.
- When entering with a user name, only the products entered by the user are displayed in the table.
- When logging in with the **admin:admin** account, all products entered by the user will be displayed in the table.
- In the About System button, the project owner's data and information about the course are displayed.
- The project must be formatted to suit the user interface.

Some project interfaces (you can design others)

Bonus:

- ✓ make a project presentation (Slide + Flow Chart).
- ✓ Use Binary File.
- ✓ Use Data Structures.

Required from you to be submitted for me:

- Explain the idea of the project
- UML Diagram.
- Project [all the project folder with the file inside should be compressed and submitted as .rar].
- Each Student is Required to Submit, in His Moodle account, a rar or zip file Containing the Project File and by 11:59 pm. on Monday 19th June 2023. The Submitted File Name must be in the format: YourName_YourID.rar.

Notes:

- ❖ Deadline is before 11:59 PM on 10/8/2025.
- ❖ This is a team project, means that any two copies will result in a ZERO grade in this project for all students involved.
- ❖ Each Student must Discuss the project individually.
- ❖ You must use meaningful variable names and proper indentation in your program.
- ❖ You must not share code with another student. Doing so will result in a zero grade for all students involved.
- ❖ You must write your triple name and your ID university in each class in first line and last line. (Name and id as a comment in each class).
- ❖ The project you submit must be your own work and not copied from other sources. Doing so will result in a zero grade.
- ❖ Any missing functions or Not working properly means zero for that part of the project.
- ❖ The total mark for this project is 10.
- ❖ If there is any match between the projects, both will take a zero mark in the project.
- ❖ Copy and paste is not accepted, both students will get a mark of zero.

Best wishes and Good Luck

Visual Programming
