Label

Label

Label()

Label(String text)

Label(String text, Node graphic)

Label Methods

String getText()

void setText(String text)

void setTextFill(Paint value)

void setBackground(Background value)

void setFont(Font newFont)

void setUnderline(boolean value)

void setRotate(double degree)

void setWrapText(boolean value)

void setLineSpacing(double value)

void setPadding(Insets value)

Label Methods

void setPrefSize(double prefWidth, double prefHeight)

void setContentDisplay(ContentDisplay value)

void setDisable(boolean value)

Label Example Sentences

```
Label label = new Label("Welcome");  
label.setFont(new Font("Arial", 32));  
label.setTextFill(Color.RED);  
label.setBackground(new Background(new  
BackgroundFill(Color.GRAY, CornerRadii.EMPTY,  
Insets.EMPTY)));  
label.setPadding(new Insets(10));
```

Label Example Sentences

```
Image image = new  
Image(getClass().getResourceAsStream("/images/smily-  
face.png"));  
Label label = new Label("Welcome", new  
ImageView(image));  
label.setContentDisplay(ContentDisplay.LEFT);
```

Label Example Sentences

Label label = new Label("Welcome");

label.setFont(new Font("Arial"));

label.setTextWrapText(true);

label.setMinWidth(1);

label.setPrefWidth(1);

label.setMaxWidth(1);

Label Example Sentences

Label label = new Label("Welcome");

label.setFont(new Font("Arial"));

label.setRotate(45);

Label Example Sentences

```
label.setOnMouseEntered((MouseEvent e) -> {  
    label.setTextFill(Color.RED);  
    label.setScaleX(1.2);  
    label.setScaleY(1.2);  
});
```

```
label.setOnMouseExited((MouseEvent e) -> {  
    label.setTextFill(Color.BLACK);  
    label.setScaleX(1);  
    label.setScaleY(1);  
});
```
